Incremental Group

Incremental Group's aim is to transform organisations with useful technology, so it's no surprise that they required a top class workspace facility when they opened up a new office in Glasgow's Garment Factory.

Location: Glasgow

System: Float

Client: AKP

Working with fit out firm AKP and Incremental Group directly, Movawall was able to assist in shaping this perfect workspace by manufacturing and installing a selection of agile Float panels in a variety of finishes.

Float helps to create a flexible environment and offers a variety of panel finishes that both complement the design of this workspace, and are also practical thanks to the option of magnetic, pinnable and drywipe surface finishes that are all perfect for activity-based working.
